The general GRE, transcripts, letters of recommendation and a statement of purpose.

Several proof-based mathematics classes, including, for example, real analysis and abstract algebra.

We have no formal minimum requirements.

Participation in an REU, other types of undergraduate research projects, or similar math-intensive summer programs is valued, but not essential. Letters of recommendation (especially, if applicable, those from REU directors) are given large weight. The subject GRE is optional, but will be given weight if a score is submitted.

**Current Practice on Application Fee Waiver:**

The graduate college allows Project 1000 applicants to request a fee waiver
