Math Alliance Research Study at the Field of Dreams

The Math Alliance Research Study at the University of Illinois at Urbana-Champaign will be hosting drop-in office hours during the 2014 Field of Dreams Conference. Members of the research team will be available to answer questions about the project and its findings to date, as well as issues pertaining to underrepresented students in STEM, STEM recruitment and retention programs, and the development of grant proposals aimed at improving students' access and equity in the STEM fields. Faculty who are interested in incorporating STEM education literature in their recruitment, retention, and grant proposal efforts are particularly encouraged to attend.

- Friday 3:30-5:30pm
- Saturday 10:00am-12:00pm and 4:00pm-6:00pm
- Sunday 9:00-10:00am

If you are unable to attend the office hours during the times listed, please contact Dr. Casey George-Jackson (cgeo@illinois.edu) to arrange an alternate time.

Field of Dreams Reminder

Faculty — We are just a few short weeks away from this year’s Field of Dreams Conference! Please let us know if you are planning to attend this year’s conference by submitting your online registration. Also October 20th is the last day to receive the discounted conference rate on your hotel room, so make sure to get your hotel reservations secured.

Predoctoral Scholars — If you have been selected to attend the Field of Dreams Conference you should have received information on your transportation. For CSU students you will hear from Dr. Helena Noronha about traveling by bus. For those traveling by air you should have received an e-ticket by email from Billie Townsend. If you have not received this information please contact us immediately. We look forward to seeing you all at the Field of Dreams!

Employment Opportunity

Faculty Position in Informatics:
Department of Statistics and Actuarial Science, University of Iowa

The Department of Statistics and Actuarial Science at the University of Iowa invites applications as part of a university-wide Informatics Initiative for a tenure-track position in Statistics at The University of Iowa starting August 2015. Click here to learn more about the position and how to apply.
Gaius Charles Bolin Dissertation and Post-MFA Fellowships

The Gaius Charles Bolin Fellowships at Williams College are designed to promote diversity on college faculties by encouraging students from underrepresented groups to complete a terminal graduate degree and to pursue careers in college teaching.

The Bolin Fellowships are two-year residencies at Williams, and two scholars or artists are appointed each year. Fellows devote the bulk of the first year to the completion of dissertation work—or in the case of MFA applicants, building their professional portfolios—while also teaching one course as a faculty member in one of the College’s academic departments or programs. The second year of residency (ideally with degree in hand) is spent on academic career development while again teaching just one course.

Eligibility: The Bolin Fellowships are awarded to applicants from underrepresented groups, including ethnic minorities, those who are first-generation college graduates, women in predominately male fields, or disabled scholars.

Applicants must be U.S. citizens or permanent residents who intend to pursue a professorial career in the U.S. Ph.D. candidates must have completed all doctoral work except the dissertation by the end of the current academic year. MFA candidates must be recent recipients of the degree; only those with degrees granted in 2014, or to be granted in 2015, are eligible to apply. Click here to visit the Williams College webpage to learn more!

Fresno State is now accepting applications from faculty-student research teams for the 2015 FURST program. This program aims to involve faculty and students at primarily undergraduate institutions in collaborative mathematics research.

Faculty involved in FURST will get a chance to (i) build collaborative research connections, (ii) work with research students, and (iii) incorporate undergraduate mentoring into their fall teaching schedule. FURST awards grants to research teams consisting of a faculty member and two students, to assist such teams in completing prolonged research projects. The program targets teams led by junior faculty at primarily undergraduate institutions across the United States, and students selected by these faculty.

Click here to learn more about the FURST program.
